

FIRE SAFETY 101

Even a 3 year old can learn and follow a simple plan. Practice the drill of getting outside and to your safe designated area early and often.

Always have 2 escape routes out of each room (typically a door & a window)

Pick the safest **smoke-free, route. Get low to ground & check door to see if hot. If it is, use your 2nd route.**

If you cannot get out, keep door closed. Place wet towel under door, and open window (call for help)

Choose a specific outdoor meeting spot. If you cannot get there, use family emergency communication plan.

Never re-enter house for any reason until Fire Dept deems it safe.
